

CORKEN TRAINING

# A2L REFRIGERANT TRANSITION

The HVACR industry is making the transition to more environmentally friendly (lower GWP) refrigerants. With this transition, HFCs are being phased down and there has been a growing acceptance of the use of A2L refrigerants due to their lower flammability and toxicity.

This class covers the facts about R-45B and A2L and what to expect.

## DAYTON

Tuesday

**MARCH 11**

11:00 AM – 1:00 PM

2148 Winners Circle  
Dayton, OH 45404

## MONROE

Wednesday

**MARCH 12**

11:00 AM – 1:00 PM

341 Breaden Dr.  
Monroe, OH 45050

## FLORENCE

Thursday

**MARCH 13**

11:00 AM – 1:00 PM

7910 Kentucky Dr.  
Florence, KY 41042
