

# [CORKEN TRAINING]

## HEAT PUMP FUNDAMENTALS AND INSTALLATION PRACTICES

THURSDAY  
**FEBRUARY 26**  
9:00 AM – 1:30 PM

**FLORENCE**  
7910 Kentucky Dr.  
Florence, KY 41042  
*Lunch will be provided*

### ABOUT THIS CLASS

This LG training class delivers practical, classroom-based education focused on inverter-driven heat pump systems, proper system design, and correct installation principles. Taught by an LG Application and Design Specialist, attendees will gain a clear understanding of why LG inverter technology matters, how to properly size heat pump systems, and how LG solutions are applied in real-world scenarios. The majority of the class will focus on P.W.C. (Piping, Wiring, and Charging) best practices.

### THIS CLASS COVERS:

- What is an inverter compressor?
- How to size a heat pump
- LG product overview
- Piping, Wiring and Charging (P.W.C.)
- LG Pro Dealer Pathway to Platinum Program

This class offers LG miles towards the LG Pro Dealer levels.
